

Ulmus 'Dodoens'

Высота	15 - 18 m
Ширина	6-10m
Крона	broad spherical, half-open crown
Кора и ветви	smooth, silver-grey, later dark grey with black grooves, twigs brown
Лист	ovoid, glossy dark green, 6 - 10 cm
Осенний окрас	желтый
Цветы	in dense long-stalked bundles, light green, March/April
Плоды	flat winged nutlets, round to elliptical, brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	moist and light, favours calcareous soils
Влажность почвы	устойчив к влажным почвам, устойчив к коротким наводнениям
Мощение	устойчив к мощению
Зона зимостойкости	5 (-28,8 до -23,4 °C)
Устойчивость к ветру	good, also resistant to sea wind
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Применение	аллеи и широкие улицы, побережье, промышленные зоны
Форма	штамбовое дерево, многоствольное дерево
Происхождение	De Dorschkamp, Wageningen, Netherlands, 1973

Medium-sized tree with a crown that starts off slim and ascending and later becomes broad spherical. It is a rapid grower with stiff, ascending and fairly thin branches that bend slightly. It is 15 - 18 m tall, 5 - 6 m broad. In young trees the trunk is smooth and silver-grey but it later becomes darker with black grooves. Young twigs are brown, slightly hairy and have lenticels. Later they become bare and greyish-brown. The leaves are ovoid and the leaf edge is serrated. The surface of the leaves is smooth and glossy dark green. In the autumn they turn yellow. Little sensitive to Dutch elm disease, especially when the tree is cultivated on its own rootstock. 'Dodoens' is very (sea) wind-resistant and can be of excellent use in both urban and rural settings.
