

## Styphnolobium japonicum

### PRINCETON UPRIGHT ('Fleright')

Высота	12 - 15 m
Ширина	6-8m
Крона	oval to ovoid, half-open crown
Кора и ветви	brown, grey
Лист	green, feathered leaf
Цветы	cream white, flowers in July
Плоды	grey
Колючки/шипы	None
Ядовитость	ядовитые части
Вид почвы	clayed soil, loamy soil, sandy soil, calcareous soil
Влажность почвы	устойчив к сухим почвам
Мощение	устойчив к мощению
Зона зимостойкости	6a (-23,3 до -20,6 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, устойчив к соли для улиц
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, устойчив к соли для улиц, привлекает бабочек
Применение	аллеи и широкие улицы, кашпо для деревьев, сады на крыше, промышленные зоны
Синонимы	Sophora japonica PRINCETON UPRIGHT ('Fleright')

This upright growing American selection forms a compact oval to ovoid crown and grows 12 to 15 m high. The branches and twigs are strikingly green and have many light-coloured lenticels. When broken, they emit an unpleasant odour. The compound leaves are unevenly pinnate and about 25 cm long, the partial leaves are each 2 - 6 cm long and ovate to elliptical. They turn yellow in autumn. The creamy white to creamy yellow flowers are about 1.5 cm in size and stand in terminal panicles that grow to about 30 cm long. This cultivar flowers at a younger age than the species. Because of its abundant nectar, the tree is an excellent carrier plant. The grey pods are constricted between the seeds and appear in autumn. 'Fleright' suffers little from diseases and infestations. Sophora tolerates drought well.
