

## Acer opalus

Высота	10 - 15 m
Ширина	5-10m
Крона	ovoid / egg-shaped
Кора и ветви	branches brown brown, bark brown, later flaking off in plates
Лист	palmately lobed, 3-5 (7) lobes, 16-20 cm, mat green
Осенний окрас	желтый, оранжевый, красный
Цветы	greenish yellow, with hairy pedicels, end of March
Плоды	single-seed, winged nutlets, always paired
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	preferably on calcareous, not in wet soils, well-drained
Мощение	неустойчив к мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	fairly
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, притягивает бабочек
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Central and Southern Europe and Northwest Africa (Algeria and Morocco)

Acer opalus (Italian maple) grows from a shrub form into a medium-sized tree with an ovoid to ovoid crown. Its twigs, bark and leaves are not particularly spectacular. The leaves of this Italian maple are quite variable in shape; the number of lobes varies from 3 to 7. The tips of the lobes are pointed to rounded. The upper side of the leaf is hairless, the underside is initially completely hairy, later only on the main veins. The flower stalks are also hairy, which is a distinctive feature of Acer opalus. The autumn colours can be red to deep red-brown, but are highly dependent on location and local climate. The two winged fruits are at right to acute angles to each other.
