

Betula utilis 'Grayswood Ghost'

Высота	12 – 15 m
Ширина	6-10m
Крона	wide oval
Кора и ветви	branches brown, bark white, flaking
Лист	ovoid to oval, 8-12 cm, dark green
Осенний окрас	желтый
Цветы	catkins, yellow-green, ? ± 2 cm, ? 10-12 cm, March-April
Плоды	fruit catkins, 2,5-3.5 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, peaty soil, nutrient-poor soil, acid soil, all soil types
Мощение	устойчив к частичному мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, притягивает бабочек
Применение	аллеи и широкие улицы
Форма	штамбовое дерево, многоствольное дерево
Происхождение	greyswood Hill, Haslemere, England, 1985

'Grayswood Ghost' is a medium to large type of tree often compared to the popular 'Thornwood', seen as its English equivalent. This tree develops a broad oval crown that can grow up to 15 metres tall and about 9 metres in diameter. As with the 'Thornwood', the crown of the 'Grayswood Ghost' has a very regular shape, making it particularly suitable as an avenue tree for wide streets and lanes. The bark is initially dark brown, but changes to an almost white colour after a few years, flaking only slightly. The leaves are a glossy dark green, providing a nice contrast to the white bark. In autumn, the leaves turn to yellow before falling. This tree grows well in semi-open paving, making it suitable for wide streets and avenues as well. It roots shallowly with many fine root hairs in the topsoil.

The original 'Grayswood Ghost' was located at Grayswood Hill, England, and propagation material was collected just before the tree died. In 1985, this material was named 'Grayswood Ghost' and distributed.
