

Liquidambar styraciflua 'Oakville Highlight' PBR

Высота	5-10 m
Ширина	2-3m
Крона	columnar
Кора и ветви	brown-grey, grooved
Лист	palmate, 5-7 lobed
Осенний окрас	желтый, оранжевый, красный, фиолетовый
Цветы	yellow-green, inconspicuous, flowers in April-May
Плоды	spiky capsule, brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, acid soil
Мощение	устойчив к мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	узкие улицы
Форма	штамбовое дерево
Происхождение	Vic John Cicoella from Oakville, New South Wales, Australia, 2004

'Oakville Highlight' is a columnar tree with vigorous upright growth. Can grow 10 m tall and will then be about 3 m in diameter. The two- and three-year-old twigs do not form a cork, and the old bark, like other Liquidambar, is brownish-grey and grooved. The hand-shaped leaves are 5- to 7-lobed and relatively thick and slightly leathery. In summer, the leaves are a glossy dark green, turning yellow, orange and purple (red) in autumn. Autumn colour is highly dependent on soil type, soil moisture and local microclimate. Australian cultivar introduced in 2004 by Vic John Cicoella of Oakville, New South Wales. Hardiness zone 6.
