

Ginkgo biloba 'Saratoga'

Высота	15 - 20 m
Ширина	8-10m
Крона	broad pyramidal, light, open crown, capricious growing
Кора и ветви	twigs light brown, bark grey-brown, later deeply grooved
Лист	in clusters of 3 - 5, variable, narrow fan-shaped and very deeply dissected, about 10 cm long, green
Осенний окрас	желтый
Цветы	green, inconspicuous, April/May
Плоды	none: male cultivar, fruitless cultivar
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	any
Мощение	устойчив к мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	fairly to good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Применение	аллеи и широкие улицы, кашпо для деревьев, сады на крыше, промышленные зоны
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево, штамбовое хвойное дерево, солитерное хвойное дерево
Происхождение	Saratoga Horticultural Foundation, CA, USA, 1976

An American selection that initially has a narrow manner of growth. The crown ultimately takes on a pyramidal shape, but it grows slowly, particularly when young. Height 15 - 20 m, width approx. 10 m. The fan-shaped leaves and flower buds are on short shoots. The shape of the leaves of 'Saratoga' varies, but is always very deeply incised. The leaves grow in bundles of 3 - 5 and turn golden yellow in the autumn, although less spectacular than other cultivars. 'Saratoga' is a male type that is excellently suited as a street and avenue tree, thanks to its lack of fruit. Requires a site with ample light. Winter hardiness zone: 5a
