

Metasequoia glyptostroboides

'Sheridan Spire'

Высота	20 - 25 m, fast growing
Ширина	5-7m
Крона	narrow pyramidal, half-open crown
Кора и ветви	twigs brown, bark reddish brown, fibrous, scaling, later greyer
Лист	needles, compound and opposed, bright green
Осенний окрас	оранжевый
Цветы	inconspicuous ♂catkins, 5 - 10 cm long, ♀yellowish green, 0.5 cm, May
Плоды	ovate to spherical cones, 2 - 2.5 cm, green to reddish brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	moist and well-drained
Влажность почвы	устойчив к влажным почвам
Мощение	устойчив к мощению
Зона зимостойкости	5b (-26,0 до -23,4 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Применение	аллеи и широкие улицы, кашпо для деревьев, сады на крыше, промышленные зоны
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево, штамбовое хвойное дерево, солитерное хвойное дерево
Происхождение	Sheridan Nurseries, Oakville, Ontario, Canada, 1968

A tree that, like the species, can easily reach over 20 m, but which has a distinctly narrower pyramidal crown. The bark is reddish brown and fibrous and peels off in long strips. The straight, vertical trunk has regular branching. Older branches are virtually horizontal and relatively short. The compound needles stand on short and long shoots and are opposed, unlike Taxodium. Metasequoia is a healthy tree which is reflected in the bright green foliage. In autumn it turns deep orange-brown before falling off with the short shoots. Its deep rooting makes the tree very wind resistant and it tolerates a lot of moisture. Mainly grows on lighter soils.
