

## Pinus sylvestris 'Glauca'

Высота	12 m
Ширина	5-8m
Крона	round, dark, dense crown, capricious growing
Кора и ветви	twigs orange-brown, bark grey-brown, peeling in rough strips
Лист	stiff needles, slightly twisted, in twos, 4 - 6 cm, intense grey-blue, evergreen
Цветы	in clusters b the young shoots, light lemon-yellow, fragrant flowers
Плоды	pendent cones, 1 - 5 together, 3 - 7 cm long, 2 - 3 cm wide
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	well-drained, quite dry soils, lightly acidic
Влажность почвы	устойчив к сухим почвам
Мощение	неустойчив к мощению
Зона зимостойкости	2 (-45,5 до -40,1 °C)
Устойчивость к ветру	good, also tolerates sea wind
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, дерево-источник питания для птиц
Применение	кашпо для деревьев, сады на крыше, побережье, промышленные зоны
Форма	штамбовое дерево, многоствольное дерево, штамбовое хвойное дерево, солитерное хвойное дерево
Происхождение	Germany, circa 1990

Spherical tree which may grow rather slowly when young but can eventually reach around 12 m. The twigs are strikingly orange-brown. The mature bark is grey-brown and peels off in rough strips. The stiff, rather short needles have a slight twist and are 4 to 6 cm long. They are in twos and intense grey-blue. The grey-brown cones hang alone or in clusters of 2 to 5. This Pinus even grows in extreme conditions although it prefers well-drained, lightly acidic, quite dry soils. Very resistant to (sea) wind and not sensitive to air pollution. The cultivar name, 'Glauca' was given to it after 1 January 1959 and is not valid according to the nomenclature rules. This takes nothing away from the fact that it is a fine tree.
