

Acer xfreemanii AUTUMN BLAZE ('Jeffersred')

| | |
|------------------------------------|---|
| Высота | 12 - 15 m, fast growing |
| Ширина | 9-12m |
| Крона | broad pyramidal to oval, dark, dense crown |
| Кора и ветви | smooth, grey-brown |
| Лист | 5 lobes, thick, shiny bright green with red veins and leaf stem, 8-10 cm |
| Осенний окрас | оранжевый, красный |
| Цветы | reddish flower corymbs, female flowers, March/April |
| Плоды | single seeds, winged, always in pairs, few or entirely absent, fruitless cultivar |
| Колючки/шипы | None |
| Ядовитость | неядовитый, обычно |
| Вид почвы | any, but not too limy |
| Мощение | устойчив к мощению |
| Зона зимостойкости | 4 (-34,4 до -28,9 °C) |
| Устойчивость к ветру | good |
| Прочие виды устойчивости | устойчив к морозам, зона 1 - 6, сустойчив к ветру |
| Дерево-среда обитания для животных | устойчив к морозам, зона 1 - 6, сустойчив к ветру, притягивает бабочек |
| Применение | аллеи и широкие улицы |
| Форма | штамбовое дерево |
| Происхождение | Jeffers Nursery, Fostoria, OH, USA, 1980 |
| Синонимы | Acer x freemanii 'Autumn Blaze' |

Medium-size tree up to approx. 15 m height with regular, broad, pyramidal crown. The bright green, 5-lobed leaves are fairly small and less deeply dissected than with *A. saccharinum*. They have red stems and a greyish underside. In autumn it turns deep orange-red to intense red. The autumn colour persists quite a long time before the leaf falls. Like all *A. x freemanii*, 'Jeffersred' flourishes on most soils as long as they are not too limy. Although the plant is female, fruits rarely form. The tree was discovered at the end of the 1960s by Glenn Jeffers of the eponymous nursery, but only named in 1980.
