

Acer ×freemanii SIENNA GLEN (**'Sienna'**)

Высота	15 m
Крона	pyramidal to broad pyramidal, dark, dense crown
Кора и ветви	smooth, grey-brown
Лист	3 to 5 lobes, shiny, bright green with light red stem, 8-10 cm
Осенний окрас	оранжевый, красный
Цветы	reddish flower corymbs, female flowers, March/April
Плоды	single seeds, winged, always in pairs, few or entirely absent, fruitless cultivar
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	any, but not too limy
Мощение	устойчив к мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, привлекает бабочек
Применение	аллеи и широкие улицы
Форма	штамбовое дерево
Происхождение	Bradley K. Hanson, Mahtomedi, MN, USA, circa 1990
Синонимы	Acer rubrum 'Sienna Glen'

Strongly growing, medium-size tree up to approx. 15 m height with regular pyramidal and later broad pyramidal crown. The leaves sprout green and stay shiny green in colour throughout the summer. The leaf stems are light red on top. The leaf is relatively small for an A. ×freemanii cultivar. In autumn the leaf turns vivid orange-red to deep scarlet. The autumn colour persists quite a long time before the leaf falls. Although the plant is female, fruits rarely form. Less suitable for use in narrower streets due to its strong growth and fairly broad crown, but the tree is a good adornment for avenues, wide streets and parks. Like all A. xfreemanii, this flourishes on most soils as long as they are not too limy.
