

Acer capillipes

Высота	5 - 8 (12) m
Ширина	4-5m
Крона	vase shaped, half open: as a shrub with overhanging branches, light, open crown, capricious growing
Кора и ветви	conspicuously grey-white striped
Лист	3/5 lobes, green, 6 - 12 cm long
Осенний окрас	оранжевый, красный
Цветы	6 - 12 cm long racemes, green-white, May
Плоды	single-seeded, winged, always in pairs
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	lightly acid soil
Мощение	неустойчив к мощению
Зона зимостойкости	6a (-23,3 до -20,6 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, притягивает бабочек
Применение	кашпо для деревьев, сады на крыше, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Japan

Very beautiful small tree with the striking feature of the conspicuously grey-white striped bark. This is best visible when juvenile. When the trunk grows thicker this remarkable feature fades gradually. The young twigs are of a shiny red. The dark green leaves have three pointed lobes. In autumn they turn from orange-red to deep red. The flowers grow in long, pendent racemes, the winged seeds turn from light green to red-brown. A. capillipes has a half open, wide, vase shaped crown. The plant does not like a very windy site. A. capillipes likes a lightly acid soil. The plant roots shallow with a strongly branching root system. This tree of Japanese origin was imported to the west by Charles Sargent in 1892. A. capillipes is best used as a solitary in gardens and parks.
