

Acer palmatum 'Dissectum'

Высота	3 - 4 m
Ширина	3-4m
Крона	flat-topped spherical, mushroom-shaped, dark, dense crown, capricious growing
Кора и ветви	smooth, grey-brown
Лист	palmatifid with 7 deeply dissected leaf segments, mid-green
Осенний окрас	оранжевый
Цветы	red flower corymbs, May
Плоды	single seeds, winged, always in pairs, pink
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	any, except clay, and not too dry
Мощение	неустойчив к мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	moderate to poor
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	кашпо для деревьев, сады на крыше, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Japan, before 1784
Синонимы	Acer p. var. dissectum viride

Low, broad shrub, with widely overhanging branches if grafted onto a stem. The leaves are palmate and the leaf segments are also dissected nearly to the main veins. The young leaf is light green to yellowish green. The summer leaf is mid-green. In autumn it turns flaming orange to light red. ‘Dissectum’, previously also traded widely as the variety *dissectum viride*, gives its name to all of the “Dissectum Group”. A common characteristic of this cultivar group is that the leaf segments of the palmatifid leaves are very deeply dissected.
