

Acer palmatum 'Green Lace'

| | |
|--------------------------|---|
| Высота | 2 - 3 m |
| Ширина | 2-3m |
| Крона | flat-topped spherical, mushroom-shaped, dark, dense crown, capricious growing |
| Кора и ветви | smooth, grey-brown |
| Лист | palmatifid with 5 to 7 deeply dissected leaf segments, bright green |
| Осенний окрас | желтый |
| Цветы | red flower corymbs, May |
| Плоды | fruitless cultivar |
| Колючки/шипы | None |
| Ядовитость | неядовитый, обычно |
| Вид почвы | any, except clay, and not too dry |
| Мощение | неустойчив к мощению |
| Зона зимостойкости | 6 (-23,3 до -17,8 °C) |
| Устойчивость к ветру | moderate to poor |
| Прочие виды устойчивости | устойчив к морозам, зона 1 - 6 |
| Применение | кашпо для деревьев, сады на крыше, небольшие сады, сады в патио |
| Форма | штамбовое дерево, многоствольное дерево |
| Происхождение | Fratelli Gilardelli, Agrate Brianza, Italy, ca 1980 |

Low, broad shrub, with widely overhanging branches if grafted onto a stem. The leaves are palmate and the leaf segments are also dissected nearly to the main veins. The bright green colour emphasises the fine leaf structure and the plant does full justice to its cultivar name. There can therefore be no doubt that 'Green Lace' belongs to the "Dissectum" group. On emerging, the leaf is a creamy green. In the autumn, the leaf turns deep yellow, which is fairly unusual as most cultivars turn orange or red.
