

## Acer platanoides 'Farlake's Green'

<b>Высота</b>	15 - 20 m
<b>Ширина</b>	8-10m
<b>Крона</b>	broad pyramidal to round, dark, dense crown
<b>Кора и ветви</b>	twigs light brown-green, bark smooth, olive green to green-brown
<b>Лист</b>	5-lobed, dark green, about 20 cm, autumn colour yellow
<b>Цветы</b>	yellow-green, in corymbs, April, before the leaf development
<b>Плоды</b>	winged nutlets (samara), 3.5 - 4.5 cm long
<b>Колючки/шипы</b>	None
<b>Ядовитость</b>	ядовитые части
<b>Вид почвы</b>	any soil, except peat
<b>Влажность почвы</b>	устойчив к коротким наводнениям
<b>Мощение</b>	устойчив к частичному мощению
<b>Зона зимостойкости</b>	4 (-34,4 до -28,9 °C)
<b>Устойчивость к ветру</b>	good: cannot tolerate sea wind
<b>Прочие виды устойчивости</b>	устойчив к морозам, зона 1 - 6, сустойчив к ветру
<b>Дерево-среда обитания для животных</b>	устойчив к морозам, зона 1 - 6, сустойчив к ветру, притягивает бабочек
<b>Применение</b>	аллеи и широкие улицы, промышленные зоны
<b>Форма</b>	штамбовое дерево, многоствольное дерево
<b>Происхождение</b>	G. Vermeer & Zonen, Opheusden, Netherlands, 1983

Medium-sized tree that can reach a height of circa 20 m. It is a strong grower with an evenly wide- pyramidal to round crown. The tree draws the attention because of its typical olive-green bark. During the juvenile years the branches grow very vertically, only after years does the crown become rounder. The leaves are dark green and turn yellow in autumn. The flowers are of the species. 'Farlake's Green' is well suitable for application as an avenue tree. It demands little from the soil, but stagnating groundwater and peaty soil are not tolerated. The tree is resistant to strong winds. Winter hardiness zone: 4.
