

Acer rubrum REDPOINTE ('Frank Jr.')

Высота	10 - 15 m, fast growing
Ширина	8-10m
Крона	oval to (broad) pyramidal, dark, dense crown
Кора и ветви	grey trunk, dark reddish-brown twigs
Лист	palmate, lobed, shiny dark green, ca 10 cm
Осенний окрас	красный
Цветы	red, in small umbels, march/april
Плоды	winged nutlets, always in pairs, ca 2 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	moist, not calcareous
Мощение	устойчив к частичному мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	аллеи и широкие улицы
Форма	штамбовое дерево, многоствольное дерево
Происхождение	J. Frank Schmidt & Son Co., Boring, OR, USA, 2005

In contrast to most red maple cultivars, Redpointe was not only selected for its autumn colours. In comparison to other *A. rubrum* cultivars, the strength of Redpointe is its relatively slender crown form and the straight-growing main stem. The tree originated in a hybridisation programme intentionally designed to develop a tree with these qualities. It is a healthy, vigorously growing tree with a very regular crown. The summer leaf is a shiny dark green, turning a splendid bright red in autumn. Highly suitable as a street and park tree. Its growth will stagnate on calcareous soil. In such soil, as with very dry soil, the autumn change of colour will be less noticeable. Moderately tolerant of wind, with poor tolerance of sea wind.
