

Acer saccharum BELLE TOWER ('Reba')

Высота	10 - 15 m
Ширина	6-10m
Крона	narrow ovoid, dark, dense crown
Кора и ветви	grey bark, greenish brown branches
Лист	3/5 lobes, fresh green, 8 - 15 cm
Осенний окрас	желтый, оранжевый
Цветы	greenish yellow, inconspicuous, march
Плоды	winged nutlets, 4 - 5 cm long
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	hardly any soil requirements, not too moist
Мощение	неустойчив к мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	moderate to poor
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, медонос
Применение	аллеи и широкие улицы
Форма	штамбовое дерево
Происхождение	J. Frank Schmidt & Son Co., Boring, OR, USA

Medium-size tree, initially with an almost columnar crown, quickly becoming a narrow ovoid. The palmately lobed leaves have 3 to 5 lobes. They are a fresh green and turn orange-yellow in autumn. The tree was originally discovered in southern Tennessee and retains fresh green leaves even in warmer zones, unlike other cultivars of *A. saccharum*. 'Reba' is one of the narrowest cultivars of *A. saccharum*. Though the sugar maple thrives in many soils, a soil that is too wet is unsuitable for healthy growth. The tree cannot tolerate stagnant water and is sensitive to road salt. Poor tolerance to paved surfaces.
