

Acer 'Silver Vein'

| | |
|--------------------------|---|
| Высота | 6-8 m |
| Ширина | 4-6m |
| Крона | narrow vase-shaped, half-open crown, capricious growing |
| Кора и ветви | striped, grey, white |
| Лист | green |
| Осенний окрас | желтый |
| Цветы | yellowgreen, flowers in April |
| Плоды | inconspicuous |
| Колючки/шипы | None |
| Ядовитость | неядовитый, обычно |
| Вид почвы | loamy soil, sandy soil, peaty soil |
| Мощение | неустойчив к мощению |
| Зона зимостойкости | 5 (-28,8 до -23,4 °C) |
| Устойчивость к ветру | fairly to good |
| Прочие виды устойчивости | устойчив к морозам, зона 1 - 6, сустойчив к ветру |
| Применение | кашпо для деревьев, небольшие сады |
| Форма | штамбовое дерево, многоствольное дерево |
| Синонимы | Acer conspiciuum 'Silver Vein' |

Fairly slender, vertical tree with a fan-shaped crown. Sometimes has one trunk but frequently also has multiple trunks. The bark is among the most conspicuously marked of all the snake bark maples. Conspicuous silver-grey stripes decorate the blue-grey bark. The glossy, green leaves are 3-lobed, but the outer lobes are relatively small, reduced more or less to leaf points in some leaves. The leaf turns dark yellow in autumn. 'Silver Vein' is a splendid, solitary tree. The attractive bark features well in either gardens or parks.
