

Aesculus ×carnea

Высота	15 - 20 m
Ширина	10-15m
Крона	globular, dark, dense crown
Кора и ветви	grey-green, with light vertical grooves, non-sticky buds
Лист	usually five leaflets, dark green, circa 15 cm
Цветы	pink to red, in erect panicles, May
Плоды	few, less prickly than A. hippocastanum, Ø 4 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	all, preferably not too dry
Мощение	устойчив к частичному мощению
Зона зимостойкости	6a (-23,3 до -20,6 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, медонос
Применение	аллеи и широкие улицы
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Germany, ca 1818
Синонимы	Aesculus rubicunda

A crossing between A. hippocastanum and A. pavia. Grows slower and remains smaller than A. hippocastanum. The dense crown casts a deep shade. A mature tree can reach a height of up to 20 m and a width of 15 m. The slightly shiny, opposite leaves are more or less folded and can grow to 15 cm across. They appear early in spring and remain for a long time. The autumn colour is yellow brown. Not until a tree is 8 to 10 years old, do the conspicuously coloured flowers appear. These appear as long erect, panicles of 15 - 20 cm and are pink red. The fibrous root system consists of a main root which branches out well and goes deep into the ground. The soil must not be too dry. Intolerant to asphalt and/or hard surfaces unless the base area is large enough.
