

Aesculus ×carnea 'Plantierensis'

Высота	12 - 15 m
Ширина	8-12m
Крона	spherical, dark, dense crown
Кора и ветви	grey-green, with light vertical grooves, non-sticky buds
Лист	7 leaflets, shiny green, 15 - 22 cm
Цветы	pale yellow to flesh-coloured pink, erect panicles, May
Плоды	none, fruitless cultivar
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	all, preferably not too dry
Мощение	устойчив к частичному мощению
Зона зимостойкости	6a (-23,3 до -20,6 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	аллеи и широкие улицы
Форма	штамбовое дерево
Происхождение	Simon-Louis Frères, Metz, France, 1894
Синонимы	Aesculus ×plantierensis

A hybrid between *A. hippocastanum* and *A. x carnea*. Eventually growing into a large tree with a heavy crown that throws a dark shade. The 7-lobed leaf consists of stalkless leaflets that are dark green on top and lighter underneath. Characteristic is the light hair growth along the veins and the underside of the leaf. The flower panicles are large: they have the same size as those of the *A. hippocastanum*. The colour of the flower is pale yellow when it appears and turns to a flesh-coloured pink. The tree bears no fruits, which makes it very suitable for squares and streets. The root system is formed by a main root which branches out well and goes deep into the ground. The soil must not be too dry. Intolerant to asphalt surfaces, unless the base area is large enough.
