

Aesculus pavia 'Atrosanguinea'

Высота	circa 15 m
Ширина	8-10m
Крона	round, closed, dark, dense crown
Кора и ветви	brown, twigs sometimes with short hairs
Лист	5/7 leaflets, unfolds reddish, later light green, 10 - 15 cm
Осенний окрас	желтый, оранжевый
Цветы	panicles, dark red, June
Плоды	smooth, light brown, irregular fruiting
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	few requirements
Мощение	неустойчив к мощению
Зона зимостойкости	6b (-20,5 до -17,8 °C)
Устойчивость к ветру	bad
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, медонос
Форма	штамбовое дерево, многоствольное дерево
Происхождение	south eastern North America

Although this cultivar grows fairly slowly, it reaches considerably higher than the species. Eventually it attains a height of 15 m. The spreading round crown is dense. The thick twigs have non-sticky buds. The leaves unfold with a reddish colour and turn to light green. They are opposite and become up to 15 cm across. They are palmately compound and consist of 5 to 7 smaller, obovate leaflets. 'Atrosanguinea' has a yellow brown to orange autumn colour and the leaves are shed early. The rather small, dark red flowers appear in erect panicles and become 10 to 15 cm. The tree prospers best in slightly moist soil. Good hardiness. Intolerant to hard surfaces and is susceptible to deicing-salt (for icy roads).
