

Amelanchier rotundifolia 'Edelweiss'

Высота	2-3 m
Ширина	2-3m
Крона	broad ovoid, light, open crown
Кора и ветви	grey
Лист	green, silvergrey
Осенний окрас	желтый, оранжевый, красный
Цветы	cream white, flowers in April
Плоды	edible fruits, blue, black
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	loamy soil, sandy soil, peaty soil, acid soil, calcareous soil
Мощение	устойчив к частичному мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, устойчив к ветру
Применение	кашпо для деревьев, сады на крыше, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево

Grows naturally as a shrub, but frequently grafted onto a stem in practice. The loose branching pattern produces an open crown. On emerging, the leaf has white, felt-like hairs on the underside, giving it a silver-grey appearance. These hairs disappear in the summer and the oval leaves are conspicuously grey-green. The autumn colours vary each year, but are usually a combination of yellow, orange and red hues. The creamy white flowers are strikingly large and grouped in dense racemes. The edible fruits are fairly small and blue-black. Amelanchier has few soil requirements but grows best in calcareous soil.
