

Betula populifolia 'Whitespire'

Высота	10 - 15 m
Ширина	5-7m
Крона	pyramidal, light, open crown
Кора и ветви	white, not peeling
Лист	triangular, tapers to elongated tip, fresh green
Осенний окрас	желтый
Цветы	yellow-green catkins, April
Плоды	yellowish brown fruiting catkins, about 3 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	few requirements, tolerates drought
Влажность почвы	устойчив к сухим почвам
Мощение	неустойчив к мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Применение	аллеи и широкие улицы
Форма	штамбовое дерево
Происхождение	Edward R. Hasselkus, University of Wisconsin, Madison, Wisconsin, USA, 1983
Синонимы	Betula platyphylla 'Whitespire'

Medium-size tree with a regular, pyramidal crown without heavy side branches. First year twigs dark brown, older bark white, not peeling. The triangular leaf has a conspicuously long, tapered tip. It is fresh green and turns golden yellow in autumn. For a long time it was assumed that 'Whitespire' originated from seed collected in Asia. It was later found that a filing error had been made and that 'Whitespire' is a seedling of *B. populifolia*. Tolerates air pollution, which means it can also be used in industrial areas.
