

Castanea sativa 'Aspleniifolia'

Высота	15-20 m
Ширина	10-15m
Крона	round/spherical, dark, dense crown
Кора и ветви	brown, grey
Лист	green
Цветы	cream white, flowers in June, July, fragrant flowers
Плоды	edible fruits, brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Мощение	неустойчив к мощению
Зона зимостойкости	6a (-23,3 до -20,6 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, привлекает бабочек
Форма	штамбовое дерево

A tree with a broad and rounded crown that grows irregularly. Height 15 - 20 (25) m. The shape of the leaf differs radically from that of the species. The leaf is linear to elongated, with irregular deep incisions and is sharply serrated. Sometimes it is linear to lanceolate. The narrowest leaves, generally at the top of the summer shoots, are approx. 1 cm wide. It can happen regularly that the leaves 'revert' to assume the shape of those of the species. The dark green leaves are very glossy. Young leaves carry velvety hairs on the underside. Occasionally light-green to yellow spots occur on the green leaf. The flowers and fruit are similar to those of the species. Winter hardiness zone: 6a
