

## Castanea sativa 'Pyramidalis'

Высота	25-30 m
Ширина	6-10m
Крона	round, dark, dense crown
Кора и ветви	brown, grey
Лист	green
Цветы	cream white, flowers in June, July, fragrant flowers
Плоды	edible fruits, brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Мощение	неустойчив к мощению
Зона зимостойкости	6a (-23,3 до -20,6 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, привлекает бабочек
Форма	штамбовое дерево

Castanea sativa 'Pyramidalis'. A tree up to 30 m tall that is clearly distinguished from the species by its persistently narrower crown. The crown is pyramidal to conical. The heavy, squat, dark grey trunk twists on its axis taking the deep grooves in the bark with it. Young branches are olive-green but quickly turn reddish-brown. The elongated leaf is dark green and glossy and has a serrated edge. The flowers and fruit are the same as those of the species. But the tree flowers some weeks earlier than does the species. Winter hardiness zone: 6a
