

Cornus mas

Высота	5 - 6 m
Ширина	5-6m
Крона	wide ovate to round, dark, dense crown, capricious growing
Кора и ветви	grey brown, flaking in small plates
Лист	ovate to oval, glossy green, 5 - 10 cm
Осенний окрас	желтый, оранжевый
Цветы	in small umbels, yellow, February/March
Плоды	shiny red berry, edible, edible fruits
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	preferably calcareous
Мощение	неустойчив к мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, дерево-источник питания для птиц
Применение	кашпо для деревьев, сады на крыше, небольшие сады, сады в патио
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево
Происхождение	Central and Southern Europe, Asia Minor

Indigenous in many parts of Central and Southern Europe where the plant grows from a shrub into a multiple-stemmed small tree with a dense, eventually round crown. Slow growing. Becomes as wide as it is high. Mature stems are grey brown and flaking, young twigs are green. The leaf is glossy green and turns into yellow or orange red in autumn. A striking inflorescence in winter, well before the leaves appear. The plant is completely covered with yellow flowers that appear in small, spherical umbels. In early autumn they are followed by oval, shiny red berry-like stone fruits of circa 2 cm across. They hang from short stalks and are edible, but taste slightly sour. Suitable for making marmelade, juice and wine. Root growth is densely branched and shallow. Prefers calcareous soils.
