

Corylus colurna

Высота	20 m
Ширина	10-12m
Крона	wide ovoid to wide conical, half-open crown
Кора и ветви	grey, flaking in small plates
Лист	wide obovate, dark green, 8 - 12 cm
Цветы	♂ catkins, yellow brown, ± 12 cm, ♀ inconspicuous, February/March
Плоды	edible nuts in capriciously grown husks, edible fruits
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	few requirements, preferably calcareous sandy soil
Влажность почвы	устойчив к сухим почвам, устойчив к коротким наводнениям
Мощение	устойчив к мощению
Зона зимостойкости	5b (-26,0 до -23,4 °C)
Устойчивость к ветру	very good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, медонос
Применение	аллеи и широкие улицы
Форма	штамбовое дерево, многоствольное дерево
Происхождение	south-east Europe, Asia-Minor

A big tree with a straight, upright trunk and a wide ovoid, later often wide conical crown. This trunk gets a ridged, corky bark at an early stage. Branches too, have a soft corky bark. The leaf is wide and obovate with a double serrated margin. It is woolly haired. The inflorescence shows thick, up to 12 cm long, male catkins that hang down gracefully and inconspicuous reddish female flowers. They appear well before the leaves. The edible nuts are surrounded by capriciously grown glandular husks and are circa 2 cm across. C. colurna has a deep-rooting root system. It is a very strong tree that is little susceptible to diseases. It is drought tolerant and it also withstands hard surfaces well.
