

Fagus sylvatica 'Rohanii'

| | |
|--------------------------|---|
| Высота | 12-14 m |
| Ширина | 8-12m |
| Крона | round/spherical, dark, dense crown |
| Кора и ветви | grey |
| Лист | reddisch brown, red |
| Цветы | yellowgreen, flowers in May |
| Плоды | brown |
| Колючки/шипы | None |
| Ядовитость | неядовитый, обычно |
| Вид почвы | loamy soil, sandy soil, peaty soil, calcareous soil |
| Мощение | неустойчив к мощению |
| Зона зимостойкости | 5b (-26,0 до -23,4 °C) |
| Устойчивость к ветру | moderate |
| Прочие виды устойчивости | устойчив к морозам, зона 1 - 6 |
| Применение | кашпо для деревьев, сады на крыше |
| Форма | штамбовое дерево, разветвленное дерево |

Fagus sylvatica 'Rohanii' is a relatively small beech with a compact round crown. Due to its slow growth it does not get taller than 12 - 14 m. The dark red-brown leaf unfolds bright red. It is oblong-ovate, irregular, moderately to deeply dissected with rounded lobes and unfolds circa one week earlier than F. sylvatica. The size of the leaf is 4 - 8 cm. Inconspicuous inflorescence followed by nutlets. Park tree or solitary. Prefers not too wet, well-drained soil, rich in humus content. Moderate wind resistance. Winter hardiness zone: 5b Fagus sylvatica 'Rohanii' is a relatively small beech. The emerging leaves are a bright red and appear a week earlier than those of the common beech.
