

Hamamelis xintermedia 'Pallida'

Высота	4-5 m
Ширина	4-5m
Крона	broad vase-shaped, half-open crown, capricious growing
Кора и ветви	brown
Лист	green
Осенний окрас	желтый
Цветы	yellow, flowers in December, fragrant flowers
Плоды	brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	loamy soil, sandy soil, peaty soil, acid soil
Мощение	неустойчив к мощению
Зона зимостойкости	6b (-20,5 до -17,8 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	кашпо для деревьев, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево

Vigorous, sturdy shrub to small tree about 3 m high and 4 m wide, with a broad, fan-shaped growth pattern and a semi-open crown. The slightly glossy mid-green leaf turns yellow in autumn. The very profuse blossoming occurs in December/January. The flowers measure about 4 cm and are an intense sulphur yellow. They have a strong, very pleasant fragrance and the plant blossoms profusely every year. The exact origin of 'Pallida' is unknown, but the plant was named in 1958 at RHS Wisley Garden, UK. 'Pallida' is the best known yellow-flowering cultivar and generally regarded as one of the best Hamamelis cultivars.
