

Ilex aquifolium 'Myrtifolia'

Высота	4-6 m
Ширина	2-3m
Крона	narrow conical, dark, dense crown
Кора и ветви	brown, green
Лист	evergreen
Цветы	white, flowers in May
Плоды	fruitless cultivar
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	loamy soil, sandy soil, peaty soil, nutrient-poor soil, acid soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	7a (-17,7 до -15,0 °C)
Устойчивость к ветру	very good
Прочие виды устойчивости	сустойчив к ветру
Применение	кашпо для деревьев, побережье, небольшие сады, сады в патио

Small tree with densely branching, narrow pyramidal crown, to about 4 - 6 m tall. Young twigs are fairly thin. The conspicuously glossy, dark green leaves are narrow oval to elongated, 3 - 4 cm long and barely half as wide. The leaf margins have 6 - 8 thin, forward-pointing spikes, equally distributed on each side. The flowers are small and fairly inconspicuous. This male cultivar does not bear fruit. Prefers a humic, moist but well-drained soil and tolerates either acidic or calcareous soil. Also suitable for use as a narrow hedge.
