

Juglans regia 'Buccaneer'

Высота	10-15 m, fast growing
Ширина	15-20m
Крона	round/spherical, half-open crown
Кора и ветви	grey
Лист	green, feathered leaf
Цветы	yellowgreen, flowers in May
Плоды	edible fruits, brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	5b (-26,0 до -23,4 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Применение	аллеи и широкие улицы
Форма	штамбовое дерево, штамбовое фруктовое дерево

Juglans regia 'Buccaneer' is a vigorous and strong grower with a broad, ascending, open crown and a height of 20 - 30 m. The trunk, branches and leaves are identical to those of the species. After the emergence of the leaves the male and female flowers appear. The flowering periods overlap so that pollination always occurs. Because it produces large quantities of pollen 'Buccaneer' is a good pollinator for other cultivars, especially 'Broadview'. 'Buccaneer' produces fruit at a reasonably young age. The fruit is particularly tasty. Winter hardiness zone: 5b
