

Ligustrum japonicum

Высота	1-2 (4) m
Ширина	1-2m
Крона	vase-shaped, half-open crown
Кора и ветви	twigs grey-brown, bark grey, almost smooth
Лист	evergreen, broad ovate to elongated, 4-8 cm long, glossy dark green
Цветы	creamy white, in panicles up to 16 cm long, July-August
Плоды	berry-shaped, dull purplish black
Колючки/шипы	None
Ядовитость	ядовитые части
Вид почвы	any, if well-drained
Мощение	устойчив к мощению
Зона зимостойкости	8a (-12,2 до -9,5 °C)
Устойчивость к ветру	good, protect against dry, cold wind
Прочие виды устойчивости	сустойчив к ветру
Дерево-среда обитания для животных	сустойчив к ветру, дерево-источник питания для птиц
Применение	кашпо для деревьев, сады на крыше, побережье, небольшие сады, сады в патио
Форма	штамбовое дерево

Ligustrum japonicum is a medium-sized, well-branching, bushy shrub. Does not usually grow much taller than 2 m in culture, but can grow more than 4 m high and wide in its natural habitat. The twigs and bark are unspectacular. An important difference from the somewhat similar L. japonicum, L. lucidum, is that the young shoots of L. japonicum are finely hairy, whereas in L. lucidum they are always bare. The shiny dark green leaves are always opposite each other. The leaves are thick and leathery. In July and August, panicles appear with small creamy-white flowers, which are well-flown by bees. The tree usually flowers profusely. Flowering is often followed by dull purple-black berries, often the berries are slightly curved or flattened.

L. japonicum is a very useful evergreen shrub that does well in parks, gardens and cemeteries. Its evergreen leaves tolerate cold, drying winds poorly in winter. Preferably plant the tree in a slightly sheltered, sunny spot.
