

Liquidambar styraciflua 'Silver King'

Высота	20 m
Ширина	7-10m
Крона	broad pyramidal, relatively open, half-open crown, dark, dense crown
Кора и ветви	Dark grey, grooved, hardly any corky fissures on branches and twigs
Лист	palmately lobed, 5 lobes, glossy grey-green with irregular creamy white margin, 7 - 14 cm long
Цветы	yellow-green, inconspicuous, April/May
Плоды	round, spiky capsule on long stem, 3 - 3.5 cm long
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	fertile, loamy soil
Влажность почвы	устойчив к влажным почвам
Мощение	устойчив к мощению
Зона зимостойкости	5b (-26,0 до -23,4 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	аллеи и широкие улицы
Форма	штамбовое дерево
Синонимы	Liquidambar styraciflua 'Variegata'

Large tree with a broad, pyramidal, fairly open crown. The boughs stand at a fairly wide angle to the trunk. The grey bark is grooved. The young twigs are light yellow-green and have hardly any corky fissures. The leaf is glossy grey-green with irregular, creamy white margins and occasionally spots. The inconspicuous flowers are followed by spiky capsules that persist in the winter. Has no real autumn colour, but the green parts turn pinkish, producing an intriguing effect. In the past, various silver and gold coloured cultivars were grown under the name 'Variegata'. For the sake of clarity, this tree was named 'Silver King'. Unusual avenue tree for use in parks, wide streets and avenues, or on green belts. Prefers fertile, moist soil: cannot tolerate persisting drought.
