Liquidambar styraciflua 'Silver King'

| Высота | 20 m |
|--------------------------|--|
| Ширина | 7-10m |
| Крона | broad pyramidal, relatively open, half-open crown, dark, dense crown |
| Кора и ветви | Dark grey, grooved, hardly any corky fissures on branches and twigs |
| Лист | palmately lobed, 5 lobes, glossy grey-green with irregular creamy white margin, 7 - 14 cm long |
| Цветы | yellow-green, inconspicuous, April/May |
| Плоды | round, spiky capsule on long stem, 3 - 3.5 cm long |
| Колючки/шипы | None |
| Ядовитость | неядовитый, обычно |
| Вид почвы | fertile, loamy soil |
| Влажность почвы | устойчив к влажным почвам |
| Мощение | устойчив к мощению |
| Зона зимостойкости | 5b (-26,0 до -23,4 °C) |
| Устойчивость к ветру | moderate |
| Прочие виды устойчивости | устойчив к морозам, зона 1 - 6 |
| Применение | аллеи и широкие улицы |
| Форма | штамбовое дерево |
| Синонимы | Liquidambar styraciflua 'Variegata' |

Large tree with a broad, pyramidal, fairly open crown. The boughs stand at a fairly wide angle to the trunk. The grey bark is grooved. The young twigs are light yellow-green and have hardly any corky fissures. The leaf is glossy grey-green with irregular, creamy white margins and occasionally spots. The inconspicuous flowers are followed by spiky capsules that persist in the winter. Has no real autumn colour, but the green parts turn pinkish, producing an intriguing effect. In the past, various silver and gold coloured cultivars were grown under the name 'Variegata'. For the sake of clarity, this tree was named 'Silver King'. Unusual avenue tree for use in parks, wide streets and avenues, or on green belts. Prefers fertile, moist soil: cannot tolerate persisting drought.
