

## Magnolia 'Butterflies'

<b>Высота</b>	5-6 м
<b>Ширина</b>	5-6м
<b>Крона</b>	oval, half-open crown, capricious growing
<b>Кора и ветви</b>	brown, grey
<b>Лист</b>	green
<b>Цветы</b>	soft yellow, intense yellow, flowers in May, fragrant flowers
<b>Плоды</b>	green, seldom
<b>Колючки/шипы</b>	None
<b>Ядовитость</b>	неядовитый, обычно
<b>Вид почвы</b>	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
<b>Мощение</b>	устойчив к частичному мощению
<b>Зона зимостойкости</b>	6 (-23,3 до -17,8 °C)
<b>Устойчивость к ветру</b>	moderate
<b>Прочие виды устойчивости</b>	устойчив к морозам, зона 1 - 6
<b>Применение</b>	аллеи и широкие улицы, небольшие сады, сады в патио
<b>Форма</b>	штамбовое дерево, многоствольное дерево
<b>Синонимы</b>	Magnolia x brooklynensis 'Butterflies'

Small tree with a regular, compact, vertical ovoid or oval crown, up to about 6 m. The dark green leaf sometimes turns slightly yellow in autumn, but this is actually of no decorative value. The flowers open before the leaves develop and are about 7 cm across. The petals are soft yellow to deep yellow, while the stamens are a conspicuous red. Due to the good, deep flower colour, 'Butterflies' is one of the better yellow-blossoming hybrid cultivars of Magnolia. Blossoms fairly late in the season, making it less sensitive to night frost damage.
