

Magnolia sieboldii

Высота	4 m
Ширина	3-4m
Крона	round/spherical, dark, dense crown, capricious growing
Кора и ветви	brown, grey
Лист	green
Цветы	white, flowers in June, fragrant flowers
Плоды	red, pink
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Мощение	неустойчив к мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, привлекает бабочек
Применение	кашпо для деревьев, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево

Large, densely branching shrub, growing after many years into a small tree with a round crown. Grows to around 4 m high and wide. The obovate to elliptical leaves are blue-green in colour, especially on young shoots. The large, nodding flowers, about 10 cm in size, only open around late June/early July. They have a delightful, citrus-like fragrance and consist of 9 pure white petals. The pistils are green but the stamens are pink with dark red, contrasting beautifully with the white flowers. A splendid species from China, Korea and Japan. Its shrub-like nature makes it suitable for parks and gardens.
