

Magnolia stellata 'Rosea'

Высота	4-6 m
Ширина	4-6m
Крона	round/spherical, dark, dense crown, capricious growing
Кора и ветви	brown, grey
Лист	green
Цветы	bright pink, light pink, white, flowers in March
Плоды	redgreen
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Мощение	устойчив к частичному мощению
Зона зимостойкости	6a (-23,3 до -20,6 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Применение	кашпо для деревьев, небольшие сады
Форма	штамбовое дерево, многоствольное дерево

Usually a big shrub but sometimes grafted onto a trunk to generate a small tree with a round crown. The slow growth means that it takes many years to develop into a tree of any size. Branches very densely, eventually becoming 3 - 4 m wide. The mid-green leaf is slightly glossy. The teardrop-shaped flower buds have soft hairs. They are visible on the plant before winter. The star-shaped flowers consist of 12 - 20 petals, bright pink on opening and becoming light pink to nearly white. Even young plants bear many flowers. Suitable for use in parks and gardens.
