

Magnolia virginiana

Высота	4 - 5 (8) m
Ширина	4-5m
Крона	spreading, fanlike to round, half-open crown, capricious growing
Кора и ветви	grey-brown bark, young twigs green and hairy
Лист	oval to oblong, green, underside silvery-grey, 10 - 12 cm
Цветы	bowl-shaped, Ø 5 - 7 cm, cream white, June/July, fragrant, fragrant flowers
Плоды	elongated, pink, seeds orange-red
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	fertile, well drained
Влажность почвы	устойчив к коротким наводнениям
Мощение	устойчив к частичному мощению
Зона зимостойкости	7a (-17,7 до -15,0 °C)
Устойчивость к ветру	moderate
Дерево-среда обитания для животных	притягивает бабочек
Применение	небольшие сады
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево
Происхождение	eastern and south-eastern parts of North America
Синонимы	Magnolia glauca

Native to the swamps in the south-east of North America. This Magnolia is an evergreen there. In colder regions and only in warmer winters it is semi-deciduous. Large shrub that can grow into a small, multiple-stemmed tree. The smooth bark is grey brown and when maturing it gets shallow furrows. Young twigs are light green and lightly hairy, later bare. Underneath the shiny green leaf is silvery-grey. It is circa 10 - 12 cm long and 4.5 - 6 cm wide, drops only late in the season. The bowl-shaped flowers have a faint lemon fragrance. They are followed by elongated, erect fruits that are circa 5 cm high and 2 cm wide. The seeds are red. Suitable as a plant for coastal areas. Intolerant to heavy soils. Full sun is only tolerated if the soil is sufficiently moist.
