

Malus domestica 'Gelber Bellefleur'

Высота	6-8 m
Ширина	6-8m
Крона	round/spherical, flatened spherical, half open crown
Кора и ветви	brown
Лист	green
Цветы	white, pink, flowers in April
Плоды	edible fruits, yellow, red
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, acid soil
Мощение	неустойчив к мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	good, susceptible to sea wind
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, дерево-источник питания для птиц
Применение	небольшие сады, сады в патио
Форма	штамбовое дерево, штамбовое фруктовое дерево, полуштамбовое фруктовое дерево

Malus domestica 'Gelber Bellefleur' is a medium-growing tree with a semi-open, broadly vase-shaped to almost round crown. Its final height will be around 6-8 m. The blossom, in April, is bright pink, an additional ornamental value of this consumption apple. It is a late ripening apple that cannot be picked until October. The apples are large and cone-shaped. The colour is yellow, usually with a red blush. The flesh is medium firm. The taste is pleasantly sweet-sour and aromatic. 'Gelber Bellefleur' is a versatile apple, suitable as a hand apple as well as in dishes and in apple pie. Although this cultivar is popularly called 'Bellefleur', the correct name is 'Gelber Bellefleur'. Hardiness zone 6.
