

Malus 'Donald Wyman'

| | |
|------------------------------------|---|
| Высота | 5-6 m |
| Ширина | 5-6m |
| Крона | round/spherical, half-open crown |
| Кора и ветви | grey |
| Лист | green |
| Осенний окрас | желтый |
| Цветы | white, flowers in May |
| Плоды | red |
| Колючки/шипы | None |
| Ядовитость | неядовитый, обычно |
| Вид почвы | clayed soil, loamy soil, sandy soil, acid soil, calcareous soil |
| Мощение | устойчив к мощению |
| Зона зимостойкости | 4 (-34,4 до -28,9 °C) |
| Устойчивость к ветру | good, susceptible to sea wind |
| Прочие виды устойчивости | устойчив к морозам, зона 1 - 6, сустойчив к ветру |
| Дерево-среда обитания для животных | устойчив к морозам, зона 1 - 6, сустойчив к ветру, дерево-источник питания для птиц |
| Применение | кашпо для деревьев, промышленные зоны, небольшие сады, сады в патио |
| Форма | штамбовое дерево, многоствольное дерево |

Small tree with a round crown up to approx. 6 m tall and wide with grey-brown and smooth bark. The leaves are dark green, turning yellow in autumn. The purple-red flower buds usually only open after leaf development, around mid-May. The white flowers are approx. 4 cm. They are followed by lavish fruit yield. The crab apples are round, approx. 0.9 to 1.3 cm and shiny red. They remain on the tree until February. This Malus was discovered as a spontaneous seedling in Arnold Arboretum, Massachusetts, USA. Although this happened before 1950, the tree was only named in 1970.
