

Malus 'Elise Rathke'

Высота	3 m
Ширина	3-4m
Крона	broad weeping, half-open crown
Кора и ветви	brown
Лист	green
Цветы	light white, pink, flowers in May
Плоды	edible fruits, red
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, acid soil
Мощение	устойчив к мощению
Зона зимостойкости	3 (-40,0 до -24,5 °C)
Устойчивость к ветру	good, susceptible to sea wind
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, медонос
Применение	промышленные зоны, небольшие сады, сады в патио
Форма	штамбовое дерево, штамбовое фруктовое дерево

Top-grafted small tree with well branching, broad weeping crown. It grows to approx. 3 m tall. The oval leaves have a pointed tip and are glossy green on top, grey-green and hairy on the underside. The flowers are approx. 5 cm, pale pinkish, opening around early May. The flower buds are pink. The relatively large edible fruits measure up to 5 cm across. They are green-yellow with a red blush and edible. This old cultivar, introduced in 1886 by Baumschule Späth in Germany, is sometimes wrongly used as a synonym of *M. pulima* 'Pendula'. A quaint tree that is very susceptible to scab.
