

Malus 'Red Sentinel'

Высота	5 - 6 m
Ширина	4-5m
Крона	round, half-open crown
Кора и ветви	hairless, dark brown
Лист	ovoid, green, emerge bronze coloured, 6 - 8 cm
Цветы	pure white, Ø 4 - 4.5 cm, pale purple when in bud, May
Плоды	purplish-red, remain on tree until January, Ø up to 2.8 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	nutritious, well drained soil
Мощение	устойчив к частичному мощению
Зона зимостойкости	3 (-40,0 до -24,5 °C)
Устойчивость к ветру	good, susceptible to sea wind
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, дерево-источник питания для птиц
Применение	кашпо для деревьев, сады на крыше, промышленные зоны, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево
Происхождение	New Zealand, before 1959

Small tree with a rounded crown. The branches grow outwards, later becoming somewhat pendulous. The twigs and bark are hairless and dark brown. The green leaves emerge bronze coloured and have red-tinted stems. The flowers, approx. 4 cm in size, grow in bundles of 4 to 8 together and are single. In the bud the flowers are pink but they turn white when open. 'Red Sentinel' produces numerous, spherical, bright red fruits with a diameter of approx. 2.8 cm: they remain on the tree for a long time. Can be used in parks, public gardens and gardens. Can be used as a street tree only in stretches of greenery. Stands up well to understorey. Allowing a solitary planted shrub to grow into a multi-trunked tree can produce an attractive effect. 'Red Sentinel' requires a nutritious, not too dry soil and is somewhat sensitive to scab.
