

Malus toringoides 'Mandarin'

Высота	6 - 8 m
Ширина	5-7m
Крона	broad pyramidal, half-open crown
Кора и ветви	twigs and bark dark brown
Лист	ovate with one or two side lobes, dark green
Цветы	white, 2.0 - 2.5 cm mid-late May, fragrant flowers
Плоды	yellow with red blush, 1.5 - 1.8 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	nutrient-rich, well-drained soil
Мощение	устойчив к мощению
Зона зимостойкости	5b (-26,0 до -23,4 °C)
Устойчивость к ветру	good, susceptible to sea wind
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, дерево-источник питания для птиц
Применение	узкие улицы, кашпо для деревьев, промышленные зоны, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево
Происхождение	NAKB, Zeewolde, the Netherlands, 1997

Medium-size tree with a broad pyramidal crown, to about 8 m. The dark green leaf is ovate and has one or two pairs of side lobes so it looks like it has 3 to 5 side lobes. The flower buds are white, as are the open flowers. They are 2 to 2.5 cm and blossom quite late: around mid to late May. The lavishly produced fruits are round to pear-shaped and measure approx. 1.5 to 1.8 cm. They are yellow with a red blush. This cultivar was received, named and marketed by the the Netherlands Inspection Service for Horticulture (NAKB) from England (East Malling Research Station). Moderately susceptible to scab.
