

Parrotia persica 'Vanessa'

Высота	7 -10 (12) m
Ширина	4-5m
Крона	oval crown, half-open crown
Кора и ветви	light grey with purplish brown spots, branches olive brown
Лист	reverse ovoid to oval, green, 7 - 10 cm
Осенний окрас	желтый, красный, фиолетовый
Цветы	small flower heads, red, February/March
Плоды	spiked capsule, approx. 1 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	well-permeable
Влажность почвы	устойчив к сухим почвам
Мощение	неустойчив к мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Применение	кашпо для деревьев, сады на крыше
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево
Происхождение	England, 1840, C.A. Mey

This cultivar was selected from seedlings of the species and is distinct thanks to its straight trunk and oval crown. This makes 'Vanessa' better suited to avenues and green verges. The trunk is light grey with purplish brown spots and flaking bark plates. This is especially decorative in more mature trees. Young twigs have remarkable lenticels. The glossy leaf is dark at the edges and usually has a slanted shape, with the top half of the leaf edge undulating irregularly. The main decorative value is the autumn colours of red, yellow and purple. Mainly older specimens bloom. The flowers are about 2 cm big and are striking due to the bright red anthers. The bare shrub is spectacular when in full bloom. After flowering, 1-cm spiked brown fruit appears. The tree has a fine root system close to the surface.
