

Phellodendron amurense

Высота	6 - 12 (15) m
Ширина	10-12m
Крона	broad fan-shaped, half-open crown, capricious growing
Кора и ветви	light brown-grey, deeply grooved, corky, thick branches, yellow-brown
Лист	imparipinnate, with 7 - 11 leaf segments, green, 35 - 40 cm, feathered leaf
Осенний окрас	желтый
Цветы	greenish-yellow, in terminal plumes 8 - 12 cm long, May/June
Плоды	spherical berry, reddish-black to black, Ø approx. 1 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	all types, preferably nutritious and humic
Мощение	неустойчив к мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, дерево-источник питания для птиц
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Manchuria, Northern China, Mongolia, Korea

Originally this tree comes from the north-east of Asia where it grew in the basin of the river Amur, from which its name is derived. It grows quickly and spreads out from the trunk with heavy lateral branches. The bark is thick and corky and has deep grooves. The young twigs are thick and yellowish-brown: older twigs develop a layer of cork. The glossy, green, imparipinnate leaves consist of 7 - 11 elongated ovoid to oval leaf segments 5 - 10 cm in length with a tapering pointed leaf top. The leaves give off an aromatic scent when rubbed. The autumnal colour is yellow and the leaves fall early in the season. The greenish-yellow flower plumes are followed by fleshy berries that turn from reddish-black to black and remain hanging in the tree the entire winter. Saplings are somewhat sensitive to frost.
