

Populus x canadensis 'Spijk'

Высота	20-25 m, fast growing
Ширина	15-20m
Крона	broad ovoid, half-open crown
Кора и ветви	brown, grey
Лист	green
Цветы	red, flowers in April
Плоды	fruitless cultivar
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil
Мощение	устойчив к мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	fairly
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	аллеи и широкие улицы, побережье
Форма	штамбовое дерево

This Dutch selection has a broad crown with a straight to somewhat tortuous trunk. When young the tree is still fairly narrow and grows loosely. Young bark is light coloured. The dark green leaves are diamond-shaped to triangular and often have a red leaf stalk. In the autumn the leaves turn yellowish-green. The tree bears male catkins as flowers. 'Spijk' is little sensitive to leaf spot disease but is certainly sensitive to rust and canker. The tree is reasonably wind-resistant. Can be used in landscape and urban settings. In coastal regions it is used as a forestry tree. It prefers fertile moist soil. Winter hardiness zone: 4
