

Populus xcanescens 'De Moffart'

Высота	20 - 25 m
Ширина	12-18m
Крона	broad pyramidal, half-open crown
Кора и ветви	bark grey, foot of trunk rough
Лист	triangular to ovoid, dark green, 5 - 12 cm long
Цветы	male catkins
Плоды	none, fruitless cultivar
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	nutritious moist soils
Влажность почвы	устойчив к влажным почвам, устойчив к коротким наводнениям, устойчив к длительным наводнениям
Мощение	устойчив к мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру, устойчив к соли для улиц
Применение	побережье
Форма	штамбовое дерево
Происхождение	De Moffart, Schullen, Belgium, before 1968

Young specimens have a straight trunk with regular dense branching. Later the crown grows pyramidal. Height approx. 20 - 25 m. The tree has grey bark that is rough at the foot. The dark green leaves are triangular to ovoid and have a grey underside. Approx. 5 - 12 cm long and 4 - 9 cm wide. The leaf edge is lobed or roughly serrated. In the autumn the leaves turn yellowish-green. Bears flowers in the form of male catkins. Little sensitive to rust but very sensitive to canker. Can be used for landscapes and row planting. Also does justice as a solitary in public gardens and parks. 'De Moffart' prefers moist nutritious soils but also grows in drier less nutritious soil. Stands up well to strong winds.
