

## Prunus avium 'Bigarreau Napoléon'

Высота	6-8 m
Ширина	6-8m
Крона	broad ovoid, half-open crown, capricious growing
Кора и ветви	brown
Лист	green
Цветы	white, flowers in April
Плоды	edible fruits, yellow, orange, red
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	fairly to good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, медонос
Применение	небольшие сады, сады в патио
Форма	штамбовое дерево, штамбовое фруктовое дерево

'Bigarreau Napoléon' is a sweet cherry with a semi-open crown of 6-8 m in height. The crown is broad ovoid and slightly irregular in shape. The tree blooms in April with white blossom. The tree is not self-pollinating, so another cherry variety is needed to guarantee that 'Bigarreau Napoléon' bears fruit. Preferably, 'Early Rivers' or 'Wine Cherry' is used for this, but 'Hedelfinger Riesenkirsche' or 'Schneider's Späte Knorpelkirsche' suffice. The cherries of 'Bigarreau Napoléon' are ready for picking from the end of July to around mid-August. They are orange-yellow with a red blush and spots. The longer the cherries hang in the tree, the more red they will turn. The flesh is yellow-white and tastes pleasantly sweet. In industry, cherries are mainly used for candying.

The exact origin of 'Bigarreau Napoléon' is not known, it is an old variety, which was already grown in Germany before 1785. Hardiness zone 6.
