

Prunus avium 'Hedelfinger Riesenkirsche'

Высота	6-8 m
Ширина	6-8m
Крона	broad ovoid, half-open crown, capricious growing
Кора и ветви	brown
Лист	green
Осенний окрас	оранжевый, красный
Цветы	white, flowers in April-May
Плоды	edible fruits, red, purple/brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	fairly to good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, медонос
Применение	небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево, штамбовое фруктовое дерево

'Hedelfinger Riesenkirsche' is a sweet cherry with a semi-open crown of 6-8 m in height. The crown is broad ovoid and slightly irregular in shape. This cultivar produces beautiful orange to deep red autumn colours. The tree flowers around mid-April to early May with white blossom and is not very self-pollinating. Single trees will produce fruit, but a different cherry variety is needed for good fruiting. Preferably, 'Bigarreau Napoléon' or 'Kordia' is used for this purpose. The cherries of 'Hedelfinger Riesenkirsche' are ready for picking around mid-July. They are large and shiny dark red to brownish-red. The flesh is very juicy and pleasantly sweet. The cherries are very suitable for direct consumption, e.g. in desserts.

'Hedelfinger Riesenkirsche' was found around 1850 near Stuttgart, Germany. Hardiness zone 6.
