

## Prunus avium 'Van'

Высота	6-8 m
Ширина	6-8m
Крона	broad ovoid, half-open crown, capricious growing
Кора и ветви	brown
Лист	green
Цветы	white, flowers in March-April
Плоды	edible fruits, red
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	fairly to good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, медонос
Применение	небольшие сады, сады в патио
Форма	штамбовое дерево, штамбовое фруктовое дерево

Prunus avium 'Van' is a sweet cherry with a semi-open crown of 6-8 m in height. The crown is initially formed by strongly ascending main branches, but later becomes broadly ovoid and slightly irregular in shape. The tree flowers in March-April with white blossom. 'Van' is self-pollinating, which means that a tree of another cherry variety should not be nearby for acceptable fruit bearing. Nevertheless, the tree will produce more fruit after cross-pollination by another cherry variety. Preferably, 'Hedelfinger Riesenkirsche' or 'Kordia' is used for this purpose. The cherries of 'Van' are ready for picking around the beginning of July. The large fruits are shiny dark red, have firm flesh and taste very pleasantly sweet. They are excellent for direct consumption.

'Van' originated in Canada in 1944. Hardiness zone 6
