

Quercus castaneifolia

Высота	30 m
Ширина	20-30m
Крона	ovoid, dark, dense crown
Кора и ветви	twigs brown-grey, with irregular, deep grooves
Лист	lanceolate with serrated margin, glossy dark green, 5 - 15 cm
Цветы	golden-coloured ♂ catkins, 7 - 10 cm, May
Плоды	long ovoid, 2 - 3 cm, single or in pairs, cupule with firm, reflexed grey hairs
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	preferably limy, not too wet
Мощение	устойчив к частичному мощению
Зона зимостойкости	7a (-17,7 до -15,0 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к ветру, устойчив к соли для улиц
Применение	промышленные зоны
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево
Происхождение	Caucasus, Iran

Vigorously growing tree with a closed ovoid crown that looks stocky but can reach a height of 30 m. Young twigs are grey -brown with short, dense felt-like hair. The older bark is brownish grey and irregular deeply grooved. The leaf strongly resembles Castanea's but is slightly smaller. It is elongated-elliptical to lanceolate. The 6 to 14 shallow lobes emerge from the roughly serrated margin. The glossy dark green leaf is 5 to 15 cm long by 2 to 7 cm wide. Underside grey with dense, felt-like hair. The acorns are long ovoid and are single or in pairs. They are semi-enclosed by a cupule that is densely covered with firm, reflexed and grey-haired scales. The tree requires a warm, sunny position and a limy soil that is not too wet.
